HERRENKNECHT

Herrenknecht starts bauma 2019 with coveted Innovation Award

April 8, 2019

Schwanau / Munich, Germany

Strong start for the Herrenknecht Group at bauma 2019 in Munich, which opens its doors today and lasts until Sunday, April 14. During the opening ceremony yesterday evening, Herrenknecht AG received the coveted bauma Innovation Award 2019 in the "Machine" category for the innovative E-Power Pipe® installation method. Under the motto »The Future Tunnels« at the world's largest trade fair, the technology leader in mechanized tunnelling systems is presenting cutting-edge tunnelling technology, outstanding projects and innovative concepts for the future to the international trade visitors.

_____ A promising start for technology leader Herrenknecht at the bauma 2019 in Munich: in competition with the best manufacturers of construction machinery the newly developed and already practically proven E-Power Pipe® method for the environmentally friendly installation of underground cables was able to take the top spot in the "Machine" category. During the opening ceremony, Ulrich Schaffhauser, Management Board member received the contested trophy, the bauma Innovation Award 2019.

"In its first deployments, the E-Power Pipe® method has already proven to be very convincing. Thanks to the trenchless installation of underground cables, it protects the environment to the greatest possible extent, allows for a rapid construction progress with high quality and is also very economical," said Ulrich Schaffhauser proudly. The method was jointly developed by Herrenknecht in cooperation with Amprion GmbH and RWTH Aachen University and has already proven success in first projects, which was a prerequisite for winning the Innovation Award.

The Herrenknecht Group is represented at bauma 2019 with four booths on a total of approximately 1,600 square meters of exhibition space. The company has invited representatives of contractors, clients and planners from around the world here to present them the latest trends and developments in tunnelling technology as well as current tunnel projects.

At its main booth focusing on "Tunnelling", Herrenknecht demonstrates where the journey in tunnelling is going. Pioneering technology that makes the tunnelling process faster and more efficient, web-based services, 400 features and functions for "Safer Operations" as well as Europe's largest urban infrastructure project "Grand Paris Express" will be presented. The Group Brands booth opposite presents the Herrenknecht Group's entire portfolio of upstream and downstream equipment and services provided by highly specialized subsidiaries. Visitors from the mining sector can discuss the latest excavation technologies in that field with their colleagues at the Mining booth.

"Once again, we are expecting our most important customers as well as project partners from around the world and look forward to the constructive dialog about the present and the future in tunnelling," says Martin Herrenknecht, founder and Chairman of the Board of Management. "For us bauma is an ideal platform for informing the industry about groundbreaking technology innovations. Receiving the bauma Innovation Award 2019 for E-Power Pipe® is a successful start." As the leading industry event, the world's largest trade fair sets the trends of the future. With almost 3,500 exhibitors, an estimated 580,000 visitors from more than 219 countries and an exhibition area of 605,000 square meters, bauma 2019 already promises to be a record-breaking trade fair.

Herrenknecht AG

Herrenknecht AG is the only company worldwide to deliver tunnel boring machines for all geologies and in all diameters – ranging from 0.10 to 19 meters. The product range comprises tailor-made machines for traffic, supply and disposal tunnels, technologies for routing of pipe lines, as well as additional equipment and service packages. Herrenknecht also manufactures drilling equipment for vertical and inclined shafts as well as deep drilling rigs.

The Herrenknecht Group achieved a total output of 1,208 million euros in 2017. The independent family business employs about 5,000 people worldwide, from which up to 180 are trainees. With more than 70 domestic and overseas subsidiaries and associated companies working in related fields, Herrenknecht provides comprehensive, fast and targeted services close to each project and customer.
